SEVENTH INTERNATIONAL SEMINAR ON FUZZY SET THEORY

Institut für Mathematik, Johannes Kepler Universität Linz, Austria

September 9-13, 1985

SCIENTIFIC PROGRAM

Monday, September 9

9:00 a.m.   Ladislav KOHOUT (London, UK)
            Is there a fuzzy logic?

11:00 a.m. Josep-Maria TERRICABRAS (Girona, Spain)
            Some remarks on vague predicates

2:30 p.m.   Aldo VENTRE (Naples, Italy)
            Fuzziness structures

Tuesday, September 10

9:00 a.m.   Ulrich HÖHLE (Wuppertal, Germany)
            An intuitionistic version of Birkhoff's representation theorem for
            distributive lattices

11:00 a.m. A.K. KATSARAS (Ioannina, Greece)
            Fuzzy quasi-uniformities and fuzzy quasi-proximities

2.30 p.m.   Stephen E. RODABAUGH (Youngstown, Ohio, USA)
            Locales are singleton fuzzy topological spaces

Wednesday, September 11

9:00 a.m.   Dan BUTNARIU (Rehovot, Israel)
            Conditional fuzzy games

11:00 a.m. Siegfried WEBER (Mainz, Germany)
            Integral as norms and probabilistic norms

2:30 p.m.   Siegfried WEBER (Mainz, Germany)
            Generalizing the axioms of probability

Thursday, September 12

9:00 a.m.   Mohamed Y. BAKIER (Assiut, Egypt)
            Operations on fuzzy topologies

Friday, September 13

9:00 a.m.   Discussion - open questions
